

PUMP SYSTEMS ASSESSMENT PROFESSIONAL CERTIFICATION PROGRAM

The Pump Systems Assessment Professional (PSAP) certification is a new credential for professionals in the pump industry. When you complete the PSAP certification your clients and stakeholders will have an increased confidence in your ability to assess and resolve problems within pump systems.

Stand Out Amongst Your Peers

Validate your expertise through the certification process

Elevate Your Reputation & Marketability

Get listed on the HI website with other certified professionals

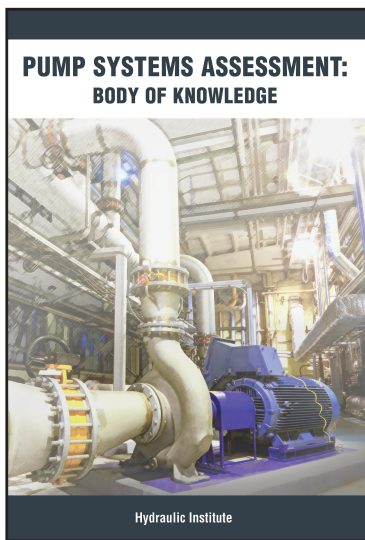

Increase the Value of Your Services

Demonstrate your commitment to energy efficiency and reliability

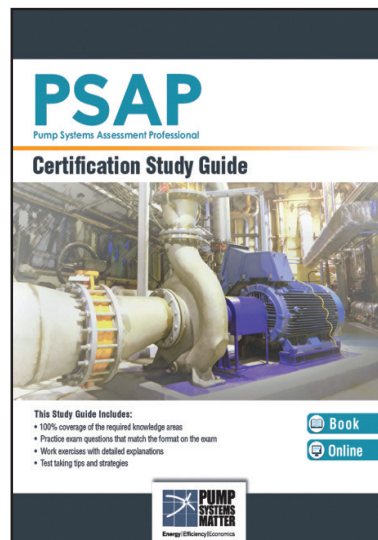

NOT SURE IF YOU ARE READY TO TAKE THE CERTIFICATION EXAM?

Not to worry. The Hydraulic Institute has the following materials to prepare you for taking the exam.

PSA BOK – Outlines and describes the knowledge, skills and abilities necessary to perform the specific tasks professionals must apply in order to conduct successful and quality pump system assessments.

PSAP Certification Study Guide – Provides sample multi-choice test questions, concise explanations, study checklist, reference materials and test strategies.

PSAP Prep Course – Where a qualified Pump Systems Matter™ Instructor offers a hands-on teaching approach to prepare for the PSAP exam.

To apply, please visit pumps.org/psap or contact us at psap@pumps.org
